Escrow Enterprise Server

3 Jan 2014

The archive contains all the code and utilities for Enterprise Server.

- Enterprise/Enterprise
    - This is the most important folder. This contains the server as it is packaged to the customers. Installing the server is described in the Admin guide.
- Enterprise/Drupal
    - This folder contains the Drupal 6 module.
- Enterprise/Drupal7
    - This folder contains the Drupal 7 module.
- Enterprise/plugins
    - This folder contains demo, example and some other sample plugins.
- Enterprise/Solr
    - This folder contains the package that is used to configure Solr.

Every IDE suitable for PHP can be used to develop the server. As long as the Enterprise/Enterprise folder is accessible by a webserver supporting PHP.
